

A COURT OF INQUIRY

TO LOOK INTO THE GROUND-
ING OF THE HOSION.

And a Court-Martial Appointed to
Try Lieutenant Irvin on Serious
Charges—The Treasurer Issues
an Important Circular.

WASHINGTON, August 9.—A court of inquiry to investigate the circumstances surrounding the grounding of the cruiser Boston, Captain O'Keane commanding, off Newport last Saturday, was appointed today. It consists of Captain S. W. A. Kirkland, J. W. Miller and John A. Howell, with Lieutenant J. A. Nicholas as judge advocate. The court will meet in New York next Tuesday, the 13th inst., as stated yesterday. This court is given unusual power of suggestion in its report whether or not it is explicit to take any further steps in the matter. The usual course is for the court to report facts, and the secretary of the navy determines whether or not any further action is necessary.

Lieutenant John C. Irvin, a member of the class under instruction at the torpedo station at Newport, has been charged with scandalous conduct, drunkenness on duty, neglect of duty, and absenting himself from his post without leave. A court-martial has been detailed to try Lieutenant Irvin on these charges, and will convene at Newport next Wednesday, the 14th inst. Captain O. Seligree is president and Lieutenant J. H. B. Blocker judge advocate.

The treasurer of the United States has issued the following circular: "Subject to the convenience of the treasury, the assistant treasurer of the United States at New York will receive deposits of gold coin or currency or draft payable to his order, collectible through the clearing house in amounts not less than \$1,000, returns for which will be made in small denominations of new United States notes and silver certificates as may be available when deposits are made; shipments to be made by the treasurer of the United States on receipt of the original certificate of deposit of the New York office. Express charges will be deducted from such remittances at government contract rates when currency is forwarded. The above notice is intended to apply to all banks and bankers through out the country who may see fit to avail themselves of its advantages."

Hungarians on a Raid.

PITTSBURG, Pa., August 9.—Private dispatches from the Connellsville coke region report that a gang of four hundred drunken Hungarian coke workers are on a raid. They do not seem to understand that the strike was settled in their favor, and this morning started out to close up the works. They first marched to Moorwood and then to the mines, and when they were refused entry they set fire to the buildings. Considerable damage was done at Moorwood and the strike was seriously hurt. Among the English speaking coke workers there is general rejoicing over the termination of the strike in their favor. The works of the entire region will be in operation next week.

Town Threatened with Ruin.

LIMA, O., August 9.—Late last night a telegram was received from St. Mary's, a town twenty-two miles south of here, asking for a fire engine. The dispatch said that the town was in danger of total destruction by fire. St. Mary's has over 2,000 inhabitants. The fire started in Barrington's livery stable; a high wind was blowing, and the flames spread to Garnett's jewelry store, Schweissel's saloon, Davis & Collin's grocery, and Limbach's saloon. No details can be received, but several persons were injured.

A One Armed Strike.

CHICAGO, August 9.—Eleven men armed with whips on the Chicago and North-western railroad are on a strike for an advance in wages. Other soldiers are threatened to go out if new men are put in their places.

Emperor William Pleased.

LONDON, August 9.—It is officially announced that Emperor William, when returning from Osborne, expressed to the Queen his utmost pleasure with his reception in England. He also expressed the hope that the Queen, responding to his strong desire, would return his visit by coming to Berlin.

A Murderer's Escape.

CHARLOTTE, N. C., August 9.—Steve Jacobs, the Croatian Indian, under sentence of death for the murder of Mrs. Harper, a white woman, escaped from the jail at Lumberton, Robeson county, last night, and two other prisoners escaped with him. Young Bennett, the jailer's son, and another assistant, took supper to the prisoners, when Jacobs snatched Bennett, cracking his skull and then beheaded the assistant. The prisoners then escaped.

A Reprieve Wanted.

LIVERPOOL, August 9.—A memorial to the government asking that Mrs. Mary Harper, a white woman, escaped from the jail at Lumberton, Robeson county, last night, and two other prisoners escaped with him. Young Bennett, the jailer's son, and another assistant, took supper to the prisoners, when Jacobs snatched Bennett, cracking his skull and then beheaded the assistant. The prisoners then escaped.

Undesirable Attachments.

PROVIDENCE, R. I., August 9.—The Massachusetts man and Trust Company placed an attachment for \$200,000 on the Riverside mills to-day. This makes \$312,000 of attachments on the property here. Nothing is known of the whereabouts of Brown, the treasurer.

The Shah Says Good-Bye.

PAKES, August 9.—The Shah bade farewell to president Carnot to-day.

CHICAGO CROOKS

Murder a Policeman and Make
Good Their Escape.

CHICAGO, Ill., August 9.—Police officer Fryer, of the Desplains street station, was shot and killed at an early hour this morning in a street fight at the corner of Desplains and Clinton streets. Officers on the adjacent beats heard the shots, and when they reached the scene, found officer Fryer lying dead with two bullet holes in his body, and two men were seen running away. An alarm was sent out, and the two men were followed. One of the men, a white man, was seen to enter a saloon, and the other, a black man, was seen to enter a warehouse. The two men were followed to the warehouse, and when they reached the scene, the two men were seen to enter a saloon, and the other, a black man, was seen to enter a warehouse. The two men were followed to the warehouse, and when they reached the scene, the two men were seen to enter a saloon, and the other, a black man, was seen to enter a warehouse.

Less Serious than Reported.

SPRINGFIELD, Ill., August 9.—Dr. Starkweather, acting secretary of the State board of health, returned yesterday from Warsaw, where he has been investigating the report of epidemic dysentery there. He said, "It is not as serious as reported. The case is partly due to a contamination of the water supply, resulting from heavy rainfall. During June and July there had 16.07 inches of rain in some places; last year there were only 2.14 inches. The number of deaths this year was thirty-eight. Of that number nineteen have died from dysentery since the epidemic broke out July 15. Four physicians of Warsaw gave me the figures for the last three weeks, showing 220 cases treated. The majority of these patients are under twenty years of age, and half of them are under five years of age. My recommendation was that there should be a thorough disinfection in a house to house sanitary survey."

Smuggling in the Chinese.

CHICAGO, August 9.—A special from San Francisco says: The Chinese are swarming in by every Hong Kong steamer, bound for Mexico; no less than sixty came a week ago, and sixteen arrived last night. The Chinese government collects a head tax of fifty dollars; whereas Mexico welcomes them.

A Caboose Car Smashed.

SOUTH BETHLEHEM, Pa., August 9.—While a caboose containing conductor Otto Sanders, brakeman Mark Christman and Wm. Garret was lying on a siding of the Lehigh Valley railroad at Penn Haven Junction at 4 o'clock this morning, an engine smashed into it, wrecking the caboose and splintering, killing Garret and fatally injuring Christman. Engineer Bennett of the engine was asleep and failed to notice signals.

Wages Increased.

LANCASTER, Pa., August 9.—The Susquehanna Rolling Mill, of Columbia, has increased the wages of puddlers from \$3.50 to \$3.85, and those of other employees in proportion. It is believed that the hands now will accept the terms and go to work at the time set, August 10. In the case of the "Bak" labor now employed is discharged, and only union labor employed.

War Between Labor Systems.

CHATTANOOGA, Tenn., August 9.—The Tradesman has received authentic information that the coal miners of Alabama are organizing to fight the convict labor system company stores, and to demand better mining laws. A convention will be held in September at a struggle inaugurated. Leaders write the Tradesman it will be war to the bitter end.

Deputy Clerk Talman Dead.

RICHTONSVILLE, Va., August 9.—W. H. Talman, deputy clerk in the chancery court, who shot himself Monday, died from the effects of his wound this morning. Soon after the shooting, Talman explained to his family that it was accidental.

THE PAWN BROKER'S SOLILOQUY.

"Tis pleasant to live in the suburbs of town,
To have my office at nine,
To trade business till two,
And then take the cars that stop at the gate,
To get home at six and a half,
To have my dinner at seven,
To have my supper at eight,
To have my bed at nine,
To have my wife at ten,
To have my child at eleven,
To have my dog at twelve,
To have my cat at one,
To have my horse at two,
To have my cow at three,
To have my pig at four,
To have my sheep at five,
To have my goat at six,
To have my chicken at seven,
To have my duck at eight,
To have my fish at nine,
To have my fruit at ten,
To have my vegetables at eleven,
To have my flowers at twelve,
To have my house at one,
To have my land at two,
To have my money at three,
To have my power at four,
To have my influence at five,
To have my respect at six,
To have my honor at seven,
To have my glory at eight,
To have my fame at nine,
To have my reputation at ten,
To have my name at eleven,
To have my life at twelve,
To have my death at one,
To have my resurrection at two,
To have my judgment at three,
To have my mercy at four,
To have my grace at five,
To have my peace at six,
To have my joy at seven,
To have my love at eight,
To have my hope at nine,
To have my faith at ten,
To have my charity at eleven,
To have my wisdom at twelve,
To have my knowledge at one,
To have my understanding at two,
To have my reason at three,
To have my intellect at four,
To have my mind at five,
To have my soul at six,
To have my spirit at seven,
To have my body at eight,
To have my flesh at nine,
To have my blood at ten,
To have my bones at eleven,
To have my marrow at twelve,
To have my sin at one,
To have my iniquity at two,
To have my wickedness at three,
To have my evil at four,
To have my guilt at five,
To have my shame at six,
To have my dishonor at seven,
To have my reproach at eight,
To have my scorn at nine,
To have my contempt at ten,
To have my derision at eleven,
To have my mockery at twelve,
To have my hatred at one,
To have my wrath at two,
To have my anger at three,
To have my wrath at four,
To have my indignation at five,
To have my indignation at six,
To have my indignation at seven,
To have my indignation at eight,
To have my indignation at nine,
To have my indignation at ten,
To have my indignation at eleven,
To have my indignation at twelve,
To have my indignation at one,
To have my indignation at two,
To have my indignation at three,
To have my indignation at four,
To have my indignation at five,
To have my indignation at six,
To have my indignation at seven,
To have my indignation at eight,
To have my indignation at nine,
To have my indignation at ten,
To have my indignation at eleven,
To have my indignation at twelve,

FOLKS YOU KNOW.

Who They Are; Where They Are,
and What They Are Doing.

Solicitor Carter is back from Knoxville. Chief of Detectives Deaver has returned from Chattanooga. Mr. H. Rountree, a prominent merchant of Wilson, N. C., was at the Swannanoa last night. Elder Harper, of Smithfield, N. C., will preach at the Farmers' warehouse tomorrow morning at 11 o'clock. Mr. Arthur M. Field, the South Main street jeweler, returned from Coopers-town, N. V., yesterday afternoon. Mrs. Fred. A. Hall is with Mr. and Mrs. J. M. Campbell at Haywood White Sulphur Springs, near Waynesville. Rev. A. Coke Smith, of Spartanburg, S. C., will dedicate Riverside Methodist church in this city tomorrow morning at 11 o'clock. A. H. Bronson, of the Southern Improvement Co., New York, and H. H. Slater and wife, of Mobile, Ala., are at the Swannanoa. Mr. R. L. Burkholder, of Lynchburg, Va., brother of architect E. W. Burkholder, of this city, is here, and expects to locate permanently in Asheville. A party of Maingentlemen, composed of Omar Clark, of Cassatunk, John K. Vilas, of Flagstaff, and William Spalding, of Bingham, were at the Swannanoa last night. Mr. N. T. Cobb is book-keeping for the Asheville Furniture and Manufacturing Co., having resigned his position at the Western North Carolina railroad office in this city. Ex-Governor Thos. J. Jarvis and wife are expected to arrive in the city this morning. After spending a few days here they will visit Senator and Mrs. Vance at Gomburton. Rev. Thomas D. Pitts, formerly rector of the Episcopal church at Wilmington, N. C., is at the Grand Central, and the Critzer hears that he contemplates making Asheville his home in future. Mrs. Mary Polk Branch, of Nashville, Tenn., and her daughters Mrs. Winn, also of Nashville, and Mrs. Howard, of Columbia, Tenn., are among the visitors at Mrs. Trenholm's, on Academy street.

RANDOM NOTES

Roped in by Rambling Reporters
Roaming Around the City.
The Light Infantry and Volunteer military companies held business meetings last evening. No Eastern mail reached the city yesterday morning owing to the failure of mail trains to connect at Salisbury. It is rumored that a new \$2 per day hotel is to be opened in the Eagle building, on South Main street, at an early date. The promenade concert for the benefit of Prof. Pearson and his orchestra will take place at Battery Park next Tuesday evening. The City Council was in regular weekly session last evening. The usual amount of routine business was transacted and the body adjourned. The german at Battery Park last evening was the most enjoyable of the season. The ball room was filled with participants, and the affair went off in fine shape. The opening ball and german at Haywood White Sulphur Springs, near Waynesville, came off last evening. A large crowd participated in the festivities of the occasion. Signs, announcing the departure of cars from certain points on the line of the electric railway, will be erected by the company, greatly to the convenience of the traveling public. Several handsome cottages are in process of construction at different points along Southside Avenue and that section of the city is fast growing in interest and importance. Every train that reached Asheville yesterday brought large crowds of tourists to this most favored spot in all the land of the sky. A hearty welcome is extended to all who may choose to come. Street railway travel was opened through to Doubleday yesterday, and the first cars went over the line without hitch or interruption, during the afternoon. A great institution is the Asheville electric street railway. The City Council has just received from Parrell & Co., of New York, one of their celebrated improved Herring safes, and our book-keeper has been heard to remark once or twice that he considers this investment on the part of THE CITIZEN company, a safe one. A large and well-pleased audience greeted Miss May Bowman in her eloquent recitals at the Farmers' warehouse last evening. The entertainment, however, was not given for the benefit of the Christian church building fund, as heretofore stated. Herein mind that the American Carnival at the Farmers' warehouse, Tuesday evening, will be the grandest entertainment ever seen in this city. Magnificent costumes, a brilliant company, delightful refreshments, etc., etc. Don't fail to attend and aid the ladies of Trinity in purchasing an organ for their church. An Aged Citizen of Virginia Dead. Winchester, Va., August 9.—Col. H. C. Laughlin, a prominent citizen, over eighty years of age, died suddenly at his residence this morning. He was wealthy, a large real estate owner at Grafton, W. Va., and was United States appraiser under Buchanan.

THE BLACK REPUBLIC.

HIPPOLYTE AND LEGITIME
KEEP UP THE FIGHT.

The Story of a Recent Battle Between the Rival Kings as Told by the Purser of the "Alva"—A Brutal and Bloody War.
NEW YORK, August 9.—Purser Squire, of the steamer Alva off Atlantic, which arrived from Haiti last night, brings Haytian news. The Alva left St. Marie at 1 p. m., July 26th, and arrived at Port au Prince at 6 p. m. of the same day. When the steamer came to anchor the noise of Hippolyte's cannons could be distinctly heard firing at the town. The attacking force was at the west of the place, about two miles away. With the aid of a powerful glass purser Squire and the officers distinctly saw Hippolyte on the sea coast. The United States man of war Ossipee lay in the harbor of Port au Prince, and near her was anchored an English and Spanish man of war. A tug boat named the Panama, formerly belonging to the United States, of about 120 tons burthen, was there too. She carried a few heavy guns, and was in Legitime's service. During the night of the 26th of July, the Panama was ordered around to where she could attack Hippolyte's bombarding party in the right flank. As soon as the little tug boat within firing distance she began to blaze away. She kept it up until darkness set in. The bombardment by the Hippolyte forces was kept up all night. The Alva left next morning Legitime took two men during the fiercest of the fight. One was killed instantly; the other lived a day. Hippolyte's losses can be reckoned in hundreds. It is said the fighting guns used by Hippolyte played sad havoc with the outskirts of Port au Prince. Officers on the Ossipee said to the people on the Alva that they (the Ossipee officers) had become used to continued firing and did not mind it a bit.

BOULANGER'S TRIAL.

The Second Day Before the High
Court of the Senate.

PARIS, August 9.—The trial of Gen. Boulanger before the High Court of the Senate was resumed to-day. The Procureur-General continuing his address, objected that Gen. Boulanger had held a veritable political court at Clermont-Ferrand while he was in command of troops there. He originated secret intrigues, electoral agitation, and a system for corrupting officials. Notwithstanding these acts, he had written to the war office that he was in connection with what had been done in his name. There were protests from Senators belonging to the party of the Right. The Procureur-General declared that there were documents before the court which clearly marked the downward path of Boulanger from insubordination to intrigue, to falsehood and conspiracy. The government also had evidence to show that Boulanger had tried to have a Prince Bismarck information that he (Boulanger) only desired, to be appointed consul for life.

CAUGHT IN THE SHAFING.

A Boy's Frightful Death at Jack-
sonville Yesterday.

JACKSONVILLE, Fla., August 9.—As Walter Crews, a fifteen year old boy, was playing in Clark's saw mill, East Jacksonville, late yesterday afternoon, he was caught in the machinery of a shaft which was making three hundred turns per minute. He was whirled about for nearly a minute and terribly injured before he could be released. When extricated both legs were found to be broken, one arm fractured and his clothing caught in the machinery of a shaft which was making three hundred turns per minute. He was whirled about for nearly a minute and terribly injured before he could be released. When extricated both legs were found to be broken, one arm fractured and his clothing caught in the machinery of a shaft which was making three hundred turns per minute. He was whirled about for nearly a minute and terribly injured before he could be released. When extricated both legs were found to be broken, one arm fractured and his clothing caught in the machinery of a shaft which was making three hundred turns per minute. He was whirled about for nearly a minute and terribly injured before he could be released. When extricated both legs were found to be broken, one arm fractured and his clothing caught in the machinery of a shaft which was making three hundred turns per minute. He was whirled about for nearly a minute and terribly injured before he could be released. When extricated both legs were found to be broken, one arm fractured and his clothing caught in the machinery of a shaft which was making three hundred turns per minute. He was whirled about for nearly a minute and terribly injured before he could be released. When extricated both legs were found to be broken, one arm fractured and his clothing caught in the machinery of a shaft which was making three hundred turns per minute. He was whirled about for nearly a minute and terribly injured before he could be released. When extricated both legs were found to be broken, one arm fractured and his clothing caught in the machinery of a shaft which was making three hundred turns per minute. He was whirled about for nearly a minute and terribly injured before he could be released. When extricated both legs were found to be broken, one arm fractured and his clothing caught in the machinery of a shaft which was making three hundred turns per minute. He was whirled about for nearly a minute and terribly injured before he could be released. When extricated both legs were found to be broken, one arm fractured and his clothing caught in the machinery of a shaft which was making three hundred turns per minute. He was whirled about for nearly a minute and terribly injured before he could be released. When extricated both legs were found to be broken, one arm fractured and his clothing caught in the machinery of a shaft which was making three hundred turns per minute. He was whirled about for nearly a minute and terribly injured before he could be released. He was whirled about for nearly a minute and terribly injured before he could be released. When extricated both legs were found to be broken, one arm fractured and his clothing caught in the machinery of a shaft which was making three hundred turns per minute. He was whirled about for nearly a minute and terribly injured before he could be released. When extricated both legs were found to be broken, one arm fractured and his clothing caught in the machinery of a shaft which was making three hundred turns per minute. He was whirled about for nearly a minute and terribly injured before he could be released. When extricated both legs were found to be broken, one arm fractured and his clothing caught in the machinery of a shaft which was making three hundred turns per minute. He was whirled about for nearly a minute and terribly injured before he could be released. When extricated both legs were found to be broken, one arm fractured and his clothing caught in the machinery of a shaft which was making three hundred turns per minute. He was whirled about for nearly a minute and terribly injured before he could be released. When extricated both legs were found to be broken, one arm fractured and his clothing caught in the machinery of a shaft which was making three hundred turns per minute. He was whirled about for nearly a minute and terribly injured before he could be released. When extricated both legs were found to be broken, one arm fractured and his clothing caught in the machinery of a shaft which was making three hundred turns per minute. He was whirled about for nearly a minute and terribly injured before he could be released. When extricated both legs were found to be broken, one arm fractured and his clothing caught in the machinery of a shaft which was making three hundred turns per minute. He was whirled about for nearly a minute and terribly injured before he could be released. When extricated both legs were found to be broken, one arm fractured and his clothing caught in the machinery of a shaft which was making three hundred turns per minute. He was whirled about for nearly a minute and terribly injured before he could be released. When extricated both legs were found to be broken, one arm fractured and his clothing caught in the machinery of a shaft which was making three hundred turns per minute. He was whirled about for nearly a minute and terribly injured before he could be released. When extricated both legs were found to be broken, one arm fractured and his clothing caught in the machinery of a shaft which was making three hundred turns per minute. He was whirled about for nearly a minute and terribly injured before he could be released. When extricated both legs were found to be broken, one arm fractured and his clothing caught in the machinery of a shaft which was making three hundred turns per minute. He was whirled about for nearly a minute and terribly injured before he could be released. When extricated both legs were found to be broken, one arm fractured and his clothing caught in the machinery of a shaft which was making three hundred turns per minute. He was whirled about for nearly a minute and terribly injured before he could be released. When extricated both legs were found to be broken, one arm fractured and his clothing caught in the machinery of a shaft which was making three hundred turns per minute. He was whirled about for nearly a minute and terribly injured before he could be released. When extricated both legs were found to be broken, one arm fractured and his clothing caught in the machinery of a shaft which was making three hundred turns per minute. He was whirled about for nearly a minute and terribly injured before he could be released. When extricated both legs were found to be broken, one arm fractured and his clothing caught in the machinery of a shaft which was making three hundred turns per minute. He was whirled about for nearly a minute and terribly injured before he could be released. When extricated both legs were found to be broken, one arm fractured and his clothing caught in the machinery of a shaft which was making three hundred turns per minute. He was whirled about for nearly a minute and terribly injured before he could be released. When extricated both legs were found to be broken, one arm fractured and his clothing caught in the machinery of a shaft which was making three hundred turns per minute. He was whirled about for nearly a minute and terribly injured before he could be released. When extricated both legs were found to be broken, one arm fractured and his clothing caught in the machinery of a shaft which was making three hundred turns per minute. He was whirled about for nearly a minute and terribly injured before he could be released. When extricated both legs were found to be broken, one arm fractured and his clothing caught in the machinery of a shaft which was making three hundred turns per minute. He was whirled about for nearly a minute and terribly injured before he could be released. When extricated both legs were found to be broken, one arm fractured and his clothing caught in the machinery of a shaft which was making three hundred turns per minute. He was whirled about for nearly a minute and terribly injured before he could be released. When extricated both legs were found to be broken, one arm fractured and his clothing caught in the machinery of a shaft which was making three hundred turns per minute. He was whirled about for nearly a minute and terribly injured before he could be released. When extricated both legs were found to be broken, one arm fractured and his clothing caught in the machinery of a shaft which was making three hundred turns per minute. He was whirled about for nearly a minute and terribly injured before he could be released. When extricated both legs were found to be broken, one arm fractured and his clothing caught in the machinery of a shaft which was making three hundred turns per minute. He was whirled about for nearly a minute and terribly injured before he could be released. When extricated both legs were found to be broken, one arm fractured and his clothing caught in the machinery of a shaft which was making three hundred turns per minute. He was whirled about for nearly a minute and terribly injured before he could be released. When extricated both legs were found to be broken, one arm fractured and his clothing caught in the machinery of a shaft which was making three hundred turns per minute. He was whirled about for nearly a minute and terribly injured before he could be released. When extricated both legs were found to be broken, one arm fractured and his clothing caught in the machinery of a shaft which was making three hundred turns per minute. He was whirled about for nearly a minute and terribly injured before he could be released. When extricated both legs were found to be broken, one arm fractured and his clothing caught in the machinery of a shaft which was making three hundred turns per minute. He was whirled about for nearly a minute and terribly injured before he could be released. When extricated both legs were found to be broken, one arm fractured and his clothing caught in the machinery of a shaft which was making three hundred turns per minute. He was whirled about for nearly a minute and terribly injured before he could be released. When extricated both legs were found to be broken, one arm fractured and his clothing caught in the machinery of a shaft which was making three hundred turns per minute. He was whirled about for nearly a minute and terribly injured before he could be released. When extricated both legs were found to be broken, one arm fractured and his clothing caught in the machinery of a shaft which was making three hundred turns per minute. He was whirled about for nearly a minute and terribly injured before he could be released. When extricated both legs were found to be broken, one arm fractured and his clothing caught in the machinery of a shaft which was making three hundred turns per minute. He was whirled about for nearly a minute and terribly injured before he could be released. When extricated both legs were found to be broken, one arm fractured and his clothing caught in the machinery of a shaft which was making three hundred turns per minute. He was whirled about for nearly a minute and terribly injured before he could be released. When extricated both legs were found to be broken, one arm fractured and his clothing caught in the machinery of a shaft which was making three hundred turns per minute. He was whirled about for nearly a minute and terribly injured before he could be released. When extricated both legs were found to be broken, one arm fractured and his clothing caught in the machinery of a shaft which was making three hundred turns per minute. He was whirled about for nearly a minute and terribly injured before he could be released. When extricated both legs were found to be broken, one arm fractured and his clothing caught in the machinery of a shaft which was making three hundred turns per minute. He was whirled about for nearly a minute and terribly injured before he could be released. When extricated both legs were found to be broken, one arm fractured and his clothing caught in the machinery of a shaft which was making three hundred turns per minute. He was whirled about for nearly a minute and terribly injured before he could be released. When extricated both legs were found to be broken, one arm fractured and his clothing caught in the machinery of a shaft which was making three hundred turns per minute. He was whirled about for nearly a minute and terribly injured before he could be released. When extricated both legs were found to be broken, one arm fractured and his clothing caught in the machinery of a shaft which was making three hundred turns per minute. He was whirled about for nearly a minute and terribly injured before he could be released. When extricated both legs were found to be broken, one arm fractured and his clothing caught in the machinery of a shaft which was making three hundred turns per minute. He was whirled about for nearly a minute and terribly injured before he could be released. When extricated both legs were found to be broken, one arm fractured and his clothing caught in the machinery of a shaft which was making three hundred turns per minute. He was whirled about for nearly a minute and terribly injured before he could be released. When extricated both legs were found to be broken, one arm fractured and his clothing caught in the machinery of a shaft which was making three hundred turns per minute. He was whirled about for nearly a minute and terribly injured before he could be released. When extricated both legs were found to be broken, one arm fractured and his clothing caught in the machinery of a shaft which was making three hundred turns per minute. He was whirled about for nearly a minute and terribly injured before he could be released. When extricated both legs were found to be broken, one arm fractured and his clothing caught in the machinery of a shaft which was making three hundred turns per minute. He was whirled about for nearly a minute and terribly injured before he could be released. When extricated both legs were found to be broken, one arm fractured and his clothing caught in the machinery of a shaft which was making three hundred turns per minute. He was whirled about for nearly a minute and terribly injured before he could be released. When extricated both legs were found to be broken, one arm fractured and his clothing caught in the machinery of a shaft which was making three hundred turns per minute. He was whirled about for nearly a minute and terribly injured before he could be released. When extricated both legs were found to be broken, one arm fractured and his clothing caught in the machinery of a shaft which was making three hundred turns per minute. He was whirled about for nearly a minute and terribly injured before he could be released. When extricated both legs were found to be broken, one arm fractured and his clothing caught in the machinery of a shaft which was making three hundred
